STATEMENT

There are certain expectations when it comes to movies. *Bob Freeman* exceeded all of my expectations. It is pure magic and fire burning with six octanes of awesome. My goal was to include as many subtle jokes as possible into a semi-serious horror film. It has the trappings of a cult classic. A movie people watch as they binge eat pizza with friends late through the night. The movie features vampires, gremlins, zombies, massive stunts, and fight scenes. *Bob Freeman* was made by a talented cast and crew who enjoyed creating something unique. It brings imagination to life. I could not be more proud of my first film.
